PUBLICATION

Y. Izawa, et al. "[Steering at the Source: Style Modulation Heads for Robust Persona Control](#)", ICLR 2026 workshop

- Dean's Award (Research)
- Developed a precise method to control Large Language Model (LLM) personality without compromising text quality, solving a common trade-off in LLM steering.
- Identified that persona/style information in LLMs is controlled by a handful of attention heads in a specific layer.
- Steering activations only at these heads mitigates sentence quality degradation compared to intervention on the residual stream, the conventional intervention target.

WORK HISTORY

The University of Tokyo Hospital, Tokyo, Japan

September 2025 - Present

Technical Support (Division of Cardiovascular Medicine, AI Development Team)

- Translated medical requirements from physicians into technical specs and developed codebase.
- Implemented information extraction pipelines from medical documents using vLLM.
- Trained Masked Autoencoder (MAE) model for various medical downstream tasks.

Akari Inc, Tokyo, Japan

August 2023 - December 2025

Student Intern (Algorithm Engineer)

- Trained domain-specific Embedding and Reranker models. ([technical blog](#))
 - Generated high-quality synthetic training datasets using local Large Language Models (LLMs).
 - Fine-tuned BERT-based models with parallel and distributed computing using DeepSpeed.
- Developed various algorithms leveraging LLM, including Search Agents and document retrieval systems.

TECHNICAL SKILLS

Languages: Python, C, Rust, TypeScript

AI/ML: PyTorch, Transformers, SentenceTransformers, DeepSpeed, vLLM, Azure AI Search

Backend: FastAPI, Node.js, PostgreSQL, Firebase Firestore

Frontend: React, Next.js

Cloud & DevOps: Docker, Cloudflare (Tunnel, Pages, R2), GCP, AWS (SageMaker, Bedrock)

Certifications: Applied Information Technology Engineer Examination (May 2023)

PROJECTS

Generative AI Ideathon of SoftBank

November 2025

Result: 11th out of 44,572 ideas

- Team Leader: Orchestrated the overall project, from core idea conceptualization to the presentation.
- Conceptualized a high-value solution that led to a successful patent filing by the organizers (SoftBank Cop.).

UGIP Data Hackathon 2025 (collaboration between The University of Tokyo and Softbank):

March 2025

Result: 3rd prize

- Developed [TherapysToy](#), an AI-powered plush toy (Raspberry Pi) to maintain mental health of children.
- Team Leader: Specified mental health problems, polished the business model and presentation slide. Implemented backend and AI model services.

Personal DevOps Infrastructure

October 2024 - Present

- Managing a dedicated Linux server at home for personal project hosting (backend and database servers).
- Leveraged Docker to containerize independent services, streamlining deployment and resource management.

EDUCATION

The University of Tokyo, Tokyo, Japan

April 2026 – March 2028 (Expected)

Master of Information Science and Technology in Computer Science

The University of Tokyo, Tokyo, Japan

April 2023 – March 2026

Bachelor of Engineering in Computer Science, GPA 3.72 / 4.3, Dean's Award (Research)

Relevant Coursework: Artificial Intelligence, Data Structures and Algorithms, Operating Systems, Computer Architecture, Compilers, High Performance Computing
